Comment of the market The Öresund Region

The economic recovery has gained full momentum, and one distinct sign that the market is now pointing upwards is that the Swedish Central Bank, Riksbanken, has started to raise interest rates. We saw two increases of 0.25 percentage points in the third quarter. An additional increase in October means that the repo rate is now 1.00 percent.

The crisis appears to be over also for the Öresund Region, although the recovery is moving significantly faster on the Swedish side of Öresund than on the Danish side. Själland was also badly hit by a property crisis in addition to the finance crisis in general. In its latest forecast (October 2010), the Öresund Institute believes that the gross regional product (GRP) will increase by 2.5 percent in the Öresund Region in 2010 in total, spread between 2.2 percent growth in Själland and 4.3 percent in Skåne. The rate of growth will then increase slightly in Denmark in 2011, while Sweden will probably be less strong. Growth in Själland is expected to be 2.7 percent, and 3.0 percent in Skåne.

Due to the lower proportion of manufacturing industry, Skåne has managed relatively well during the recession. Employment declined by 1.6 percent in Skåne in 2009, simultaneously as employment fell by as much as 2.1 percent in Sweden. With an employment growth rate of 1.5 percent, Skåne is also stronger than Sweden as a whole in 2010, where employment growth is forecasted to be 1.0 percent. In 2011, employment is anticipated to rise by 1.4 percent in Skåne.

The labour market in Denmark has experienced significantly tougher times, and employment fell by as much as 3.2 percent in 2009. But like in Sweden, the decline in employment was lower in the Öresund Region (Själland) with 2.9 percent, compared with Denmark as a whole. The problems that followed the finance and property crises have resulted in considerably poorer public finances, and rationalisation measures are being taken in the public sector. Employment growth is therefore forecasted to first turn upwards in 2011, with a rate of 0.7 percent.

Optimism is also now quite manifest in Skåne within the property market, which is traditionally late in the business cycle. We can perceive increased demand, and tenants are more self-assured in their decisions. The crisis had a greater impact on industry than the service sector, and the rise in demand pertains essentially to office premises. The rental markets in the region are relatively stable, and have been throughout the crisis. We have seen modest rises in vacancies and stable rent levels. We believe that rental markets within the near future will remain stable, apart from in Lund where the market will be temporarily tougher in view of the phasing out of AstraZeneca in 2011.

Optimism is also growing in the transactions market, where volumes have increased strongly compared with last year. According to Newsec, the transaction volume for the first three quarters of 2010 amounted to SEK 59.7 billion for items in excess of SEK 100 million, which is basically double that seen for the full-year 2009.

Rent levels for office premises in the Västra Hamnen district are currently around SEK 2,100 per m², while rent levels for modern office premises in central Malmö are slightly lower at approximately SEK 2,000 per m².

Income, expenses and result

Comparison figures for income statement items relate to values for Jan-Sep 2009 and balance sheet items as at 2009-12-31.

Rental income

Rental income amounted to SEK 957 million (928). The sum includes SEK 5 million that relates to the final settlement for 2009 for supplementary debiting. An additional SEK 4 million has been received further to the one-off termination of a lease. Other increases of rental income are attributable to indexation, renegotiation, new leases, rental income from properties acquired in 2009 and 2010, as well as projects that have been completed.

The total growth in lease income amounted to 3 per cent compared with 2009 this is in spite of the consumer price index in October 2009 which is the reconciliation month for leases' index calculation for 2010 showing a negative figure of 1.5 percentage units. Furthermore the rental income has been adversely affected by a change in exchange rates against Denmark. This effect amounts to SEK 6 million.

The leasing level is unchanged at 94 per cent, which is the same as at the end of 2009.

During the period, the signing of new lease agreements on a full-year basis amounted to SEK 107 million (95).

Notices of termination during the period were SEK 87 million (75).

Property costs

Total property costs were SEK 268 million (255). Despite the consequences of a winter that was more severe than normal there were increased costs for road maintenance and energy for the period. The deviation by comparison with a normal winter is estimated at approximately SEK 5 million.

Net operating income

The net operating income amounts to SEK 689 million (673), which is a surplus ratio of 72 per cent (73).

Central administration

Costs for central administration was SEK 24 million (23).

Property sales and changes in values

Wihlborgs disposed five properties during the period, a total purchase price of SEK 249 million. The valuation of the properties as of 30 September 2010 has been carried out internally and has resulted in the property value an increase by SEK 319 million (-7).

As of 30 September 2010 the properties' book value amounts to SEK 15,147 million. The yield is 6.6 per cent for office properties, excluding property administration and 8.6 per cent for industrial/warehouses.

Significant risks and and uncertainty factors

Wihlborgs' activities, financial position and profit are affected by a number of risk factors. The risks that represent a decisive impact on the company's profit growth are variations in lease income, changes in rates of interest, growth in costs, property valuation and taxes. To this is added the liquidity and borrowing risk. Refer to pages 52-53 and 67-68 of Wihlborgs 2009 annual report for a detailed description of the company's risks.

Accounting principles

Wihlborgs applies the IFRS (International Financial Reporting Standards) from IASB (International Accounting Standards Board) and the interpretation of these (IFRIC), adopted by the European Union.

The interim report was prepared in accordance with IAS 34 Interim Financial Reporting. The accounting principles and methods of calculations are the same as were applied in the last annual report unless stated otherwise below.

A reworked IFRS3 enterprise acquisition applies from the 2010 accounting year. The definition of what is an enterprise acquisition has been changed. For Wihlborgs, this does not imply any change compared with previously, in view of that in principle all of the Company's property acquisitions via companies will be deemed, even in the future, as being able to be treated as asset acquisitions.

Other new or revised IFRS and interpretation statements were not considered to have had any great effect on Wihlborgs' financial reports. The latest annual report, page 65-67, gives further descriptions of new and amended accounting principles.

Property portfolio as of 30 September 2010

The summaries are based on Wihlborgs' property portfolio as of 30 September 2010. Rental income pertains to contracted rental income on an annual basis as of 1 October 2010.

The net operating income is based on the properties' earnings capacity on an annual basis as of October 2010, based on contracted rental income, actual costs, property taxes and leaseholders' rent on a rolling 12-months basis. Net operating income also includes administrative costs related to property management in the amount of SEK 53 million.

Wihlborgs property portfolio consists of commercial properties' in the Öresund region, located in Malmö, Helsingborg, Lund and Copenhagen. As of 30 September 2010 the property portfolio consisted of 244 properties with a lettable area of 1,299,000 m².

Fifteen of the properties have a site leasehold right. The properties' market value was SEK 15,147m, equivalent to the properties' real value. The total rental value was SEK 1,412m and the contracted rental income on an annual basis was SEK 1,304m. The financial occupancy rate including projects was 92 per cent.

The properties in Malmö and Helsingborg represented 86 per cent of the total rental value and 84 per cent of the properties' book value. The rental value for office and retail properties and industrial/warehouse properties totalled 70 and 28 per cent of the total rental value respectively. The operating surplus from properties held for investment is SEK 955m. This item also includes the costs of property administration amounting to SEK 53m.

This cost therefore excludes the current operating surplus amounting to SEK 1,008m which, with a value of SEK 14,384m means a current yield of 7.0 per cent. When broken down according to property category this is 6.6 per cent for offices/retail and 8.6 per cent for industrial/warehouses.

Auditors' review report

Introduction

We have conducted a review of the interim report for Wihlborgs Fastigheter AB (publ) as of September 30, 2010 and for the nine-month period then ended. The Board of Directors and the CEO are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Focus and scope of the review

We conducted our review in accordance with the Standard on Review Engagements SÖG 2410, Review of Interim Financial Information performed by the Independent Auditor of the Entity issued by FAR SRS. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review has a different focus and significantly less scope than an audit in accordance with Auditing Standards in Sweden, RS, and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that would have been identified if an audit had been conducted. Accordingly, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report has not, in all material respects, been prepared in accordance with IAS 34 and the Annual Accounts Act.
